Cascade Casework Corp.
214 14th Street
Albany, OR 97322

SUBJECT: Letter of Recommendation

To Whom It May Concern:

I've worked with folks at Cascade Casework, Corp. since the inception of their firm in October of 2012. Folks there are very receptive to our goals and assist with economical solutions while maintaining quality casework. Compared to other local suppliers, Cascade Casework Corp. provides a superior product at a very competitive price enabling our visions to become a reality within our original project scope/budget.

The longer one is acquainted with folks at Cascade Casework Corp. it becomes quite evident they are competent individuals that GET THE JOB DONE with ingenuity and little assistance. They are eager to sit down with folks and develop strategies for design solutions that maintain a superior economic balance with quality products. Plus, folks at Cascade Casework Corp. aren't afraid to address the tough questions by pointing out potential design flaws with drawings before they become a problem.

When it comes to submittals they're always completed in a clean professional format and delivered in a timely manner. Plus, submittal review notes are quickly addressed and turned around for final review/acceptance. However, when it comes to change orders I have little experience since I've never had a need to implement a change. They've been so good to work with on the front end of a project that the majority of conflicts have been resolved prior to any installation work and if any problems do arise they've just taken care of them in-house.

In my opinion, folks at Cascade Casework Corp. provide a superior product over other casework manufacturers we have utilized. This highly valued cabinet maker would fit in extremely well on any team. To date, I have yet to receive a single complaint in regards to installations or quality issues. It is their tremendous enthusiasm and ability to foresee future benefits from current actions taken that make them a very special firm. They're one of the few firms I work with that will see a project completely through, efficiently and correctly.

Sincerely,
